

Comparison of Wood Flooring Grades

GRADE	DESCRIPTION	KNOTS	SAP CONTENT	COLOR VARIATION
Select & Better AB Grade	Highest grade with uniform appearance and very few pin knots.	Very small (max 10-15mm), infrequent, and healthy. No Filler Required.	Very low.	Minimal, but still present.
Select ABC Grade	Contains some knots. Some color variation, but fewer than character grade.	Small to medium (up to 20-25mm), more frequent. Filler Required.	Some sap.	Some variation.
Character ABCD Grade	Sports bigger knots compared to Select Grade, contains sap and has more color variation.	Large (up to 50mm), filled cracks and holes allowed.	Higher sap content.	More noticeable variation.
